

ARC-9200 series 12Gb/s SAS RAID Head

With innovative new ROC 12Gb/s SAS feature and support for SATA, SAS and SSDs, the 1U RAID head provides small- to mid-sized enterprises with superior levels of RAID performance and scalability for external storage. The RAID head supports flexibility interface configuration; 8 x 12Gb/s SAS ports, 2/4 x 16Gb/s fibre channels or 2 x 10Gb/s iSCSI channel host and 8 x 12Gb/s SAS ports expander for performance and easy expansion. When used with 12Gb/s SAS expanders, the controller can provide up to (512) devices through one or more SAS JBODs, making it an ideal solution for enterprise class storage applications that called for maximum configuration flexibility.

Key Features

- 12Gb/s SAS-based 1U RAID head
- Support three host interface options: 12Gb/s SAS, 10Gb/s iSCSI or 16Gb/s FC
- Support up to 8GB cache per controller, optional FBM/BBM cache
- Hot-swap and redundant components for increasing availability
- Single or dual RAID controller modular design
- Advanced configuration for video optimized performance settings
- Support HDD firmware download

Overview

Powered by Areca's existing external RAID controller design, the ARC-9200 is a brand new module RAID head delivering the combination of high performance, high reliability, and data availability required in today's data-intensive storage environments. The modular design of the RAID head minimizes maintenance effort, makes installation simpler and easy leverages different JBOD to provide an affordable, highly capable and scalable storage. With either 8 x 12Gb/s SAS ports, 2/4 x 16Gb/s fibre channels or 2 x 10Gb/s iSCSI channel host options, the 1U RAID head is an ideal solution to adapt a wide range of applications. Available in single or redundant modular architectures, the RAID head can meet the needs of the professional who needs high-performance versatile RAID storage.

Unparalleled Performance for 12Gb/s SAS

The RAID head raises the standard to higher performance levels with several enhancements including new high performance 1.2 GHz dual core ROC processor, a DDR3-1866 memory architecture and high performance PCIe 3.0 interface bus interconnection. Each controller includes one 204-pin SO-DIMM socket with default 2GB upgrade to 8GB DDR3-1600, 1RX8/2RX8, ECC SDRAM. The 12Gb/s SAS is designed for backward compatibility with 6Gb/s and 3Gb/s SAS and SATA hard drives. Regardless of the drive speed, 12Gb/s SAS RAID controllers will provide maximum read/write performance improvements for the most performance-hungry database and IT applications.

Unsurpassed Data Availability

Designed and leveraged with Areca's existing high performance RAID solution, The RAID head offers full-featured superior levels performance and enterprise level data protection for the most demanding next generation server and storage environments. It supports the hardware RAID 6 engine to allow two HDDs failures without impact the existing data and performance. It allows users to hot swap drive in the event of a drive failure with zero downtime. To achieve high availability, critical components such as controllers, power supply units and cooling modules are configured as redundant and cableless hot-swappable capability. The RAID head also supports Self-Encrypting Disks (SED) for protection of data against loss or theft of SEDs. The optional flash-based backup module (FBM) provides power to transfer the cache data from the SDRAM memory to the 8GB NAND flash if it contains data not yet written to the drives when power is lost. The RAID head also supports traditional Lithium-ion (Li-ion) battery backup module (BBM) to protect cached data on RAID Controllers.

Easy RAID Management

Configuration and monitoring can be managed either through the LCD control panel, RS232 port or LAN port. The firmware also contains an embedded terminal emulation via the RS-232 port. The firmware-embedded several available RAID managers include internet browser, CLI, Telnet, API, SMTP and SNMP via a LAN port. The ArcSAP Quick Manager can scan multiple RAID units in the local and remote side and provide an effective management interface for configuration, and monitoring Areca RAID controllers.

Model Name	ARC-9200-SAS	ARC-9200-2FC/4FC	ARC-9200-iSCSI
			
Form Factor	1U, 19-inch rackmount chassis		
Single Ctrl Model No.	ARC-9200SS-DR1	ARC-9200FS-DR1/ARC-9200FS-QR1	ARC-9200IS-DR1
